

# HDR-CX350V

High Definition **Flash Memory** Handycam® Camcorder

Capture stunning 1920 x 1080 high-definition video<sup>2</sup> and 7 Megapixel still images with the HDR-CX350V, which employs an "Exmor R" CMOS sensor for superior low-light performance and 32GB<sup>1</sup> of embedded flash memory. Optical SteadyShot™ image stabilization with Active Mode and 3-way Shake Canceling enables you to capture remarkably smooth video from wide angle to full telephoto shooting.

## Full HD Recording with 60p playback

Record amazing HD video at full 1920x1080 resolution and enjoy 60p playback via HDMI™ cable and compatible HDTV. Additionally, you can record your video at 24 Mbps, the highest possible bit-rate for AVCHD, and enjoy near Blu-ray Disc™ quality video reproduction.<sup>2</sup>

## 1/4" "Exmor R" CMOS Sensor

Delivers bright, vivid, spectacularly detailed video footage, as well as 7 Megapixel still images. Additionally, it provides stunning low-light sensitivity with improved image clarity and drastically reduced grain whether you're in video or still photo mode.

## Optical SteadyShot™ image stabilization w/ Active Mode (Wide to Tele)

Compensates for greater degrees of camera shake to deliver stunningly smooth video from wide angle to full telephoto shooting.

## Wide Angle G-Lens (27.4mm)\* with 12x Optical Zoom

Engineered for superior optical performance, Sony G lenses deliver brilliant, accurate color reproduction and sharp, amazingly detailed images. In addition, the 27.4mm\* focal length in Photo Mode and 29.8mm\* in Video Mode offers a broader perspective for enhanced wide angle shooting.

## Quick Autofocus

An improved autofocus (AF) system now lets you take crisp images even faster. In fact, this new Quick AF feature focuses twice as fast when compared to previous Sony camcorder models.

## Geotagging with built-in GPS receiver & NAVTEQ® maps

Lets you view your current location on the LCD map display, as well as "tag" your shooting locations. Tagged videos and still images can be reviewed and played back using the Map Index function on the camcorder.<sup>7</sup>

## Direct Copy to External HDD

Lets you copy videos from your camcorder directly to an external hard disk drive (sold separately)<sup>13</sup>, all without a computer. Your camcorder can also access videos stored on the external hard drive for playback on your HDTV<sup>4</sup>, allowing you to utilize the camcorder's handy playback features.

## Face Detection Technology w/ Face Priority

With Face Priority, your camcorder optimizes focus, color, exposure, and Smile Shutter™ technology for the face you prioritize. Just touch the preferred face on the LCD display and the camcorder will not only prioritize it for you, but will remember your prioritized face until the camera is turned off.

## Intelligent Auto Mode

Analyzes your shot and then automatically selects the appropriate settings from 10 distinct scene modes: Landscape, Backlight, Twilight, Spotlight, Low light, Macro, Portrait, Baby, Tripod, Walk Detection. Lets you get extra creative with 90 possible scene combinations.

## Golf Shot

Captures a few seconds of motion as a sequence of up to 22 still images, which can be viewed/printed individually or as a composite "sequence shot" image, perfect for analyzing the nuances of a golf swing, tennis serve, and other fast action.

## Additional Features:

- 2.7" Clear Photo™ LCD (230 K) display<sup>3</sup>
- Active Interface Shoe
- Dolby® Digital stereo recording with Built-in Zoom Mic
- Sony® PMB (Picture Motion Browser) software<sup>9</sup>

FOOTNOTES	

- 32GB equals 32 billion bytes. A portion of the total storage is used for system management and/or application files. The capacity that a user can use is approximately 30.8GB after deleting 650MB of demonstration video.
- This camera captures high definition footage in the AVCHD format. High Definition AVCHD discs can be created using standard DVD media, the supplied software and a compatible PC. DVD media containing AVCHD footage may be played on a compatible Blu-ray Disc™ player/recorder, PC with supplied software or PlayStation®3 devices. DVD media containing AVCHD footage should not be used with standard DVD based players, as the DVD player may fail to eject the media and may erase its contents without warning.
- Viewable area measured diagonally.
- HD viewing requires compatible HDTV and HDMI™ cable, both sold separately.
- Requires BRAVIA Sync feature in each product, including a compatible BRAVIA® HDTV. Please refer to owner's manual to determine compatibility.
- NAVTEQ map detail on the camcorder is limited in some areas. By using a compatible PC, a broadband Internet connection, and supplied Picture Motion Browser software, your photos and videos can be shown on an online map service. The online map service is currently provided courtesy of Google, and is subject to change or termination without notice.
- Requires Microsoft Windows XP SP3/ Windows Vista SP2/Windows 7. Not supported by Mac OS.
- Smooth Slow Record captures 3 seconds of video which play back over 12 seconds.
- One Touch Disc Burn feature requires DVDirect burner or compatible PC with supplied PMB software (sold separately).
- Requires USB 2.0 connection via VMC-UAM1 cable (sold separately). AC power for camcorder, and hard drive formatted in FAT32. Connection via USBhub not supported. External HDD/USB media should be less than 2TB(Terabytes).
- When using movie mode Memory Stick PRO Duo with MARK2 (M2) logo, Memory Stick PRO-HG™, SD/SDHC media (Class 4 or higher) are recommended.
